Re: Transfer of Notice of Intention, Claim 35K, S/041/013, Sevier County, Utah

Dear Mr. Grover:

We recently sent a request for an annual report to Mr. Kelly R. Park of Aggra-Insulite Marketing for Claim 35K, a small mining operation located in Sevier County, Utah. Mr. Park informed us that you have acquired an aggregate lease from the US Forest Service and have been operating the quarry since August, 1992.

Mr. Park also informed us that he had sent you a permit transfer form in January, 1993, requesting that since your company was now mining the property, you needed to sign the transfer form to get the State permit in your name. To date, he has received no response from you.

In accordance with the Utah Mined Land Reclamation Act, any type of mechanized mining activity must be permitted with this Division; therefore, we have enclosed a Small Mining Operation Notice of Intention form (MR-SMO), and also a Transfer of Notice of Intention form (MR-TRS). You may choose to either complete a new Small Mining Notice or simply complete the transfer form to transfer the existing small mining permit from Mr. Park to yourself. We request that the notice or transfer form be returned to this office no later than April 29, 1994.

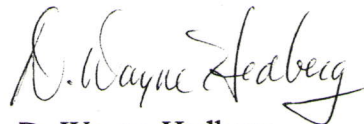

If you choose to complete the SMO form, you will be held responsible for all surface disturbances you create, reimpact, or otherwise utilize for your mining operations; therefore, we suggest that you indicate on your disturbed area map any pre-existing disturbances that you should not be held responsible for. If you choose to complete the transfer form, you will

March 28, 1994

assume responsibility for all areas currently being disturbed and also areas previously disturbed by Aggra-Insulite Company.

Thank you for your cooperation and attention to this permitting action. Please contact me or any of the minerals program technical staff should you have questions in this regard.

Sincerely,

D. Wayne Hedberg  
Permit Supervisor  
Minerals Regulatory Program
